

CORE PYTHON PROJECTS

S.N	Project	Description	Main Python Concepts
1	Student Management System	Add, update, delete, search students and calculate marks/grades.	Lists, dictionaries, functions, files, OOP
2	Personal Expense Tracker	Record daily expenses and calculate category-wise and monthly spending.	Lists, dictionaries, functions, file handling
3	Library Management System	Manage books, members, issue/return books and availability.	OOP, lists, dictionaries, files
4	Bank Management System	Create accounts, deposit, withdraw, transfer money and view transactions.	Functions, OOP, files, exception handling
5	ATM Simulator	Simulate PIN login, balance enquiry, withdrawal, deposit and mini statement.	Conditions, loops, functions, exception handling
6	Inventory Management System	Manage products, stock, sales and low-stock notifications.	Dictionaries, lists, functions, OOP
7	Grocery Store Billing System	Add products to cart, calculate bill, discount and generate receipt.	Lists, dictionaries, loops, functions
8	Quiz Application	Conduct MCQ quizzes, calculate scores and display results.	Lists, dictionaries, functions, loops
9	Contact Management System	Add, search, update and delete contact information.	Dictionaries, functions, CRUD, files
10	Hotel Management System	Manage rooms, bookings, check-in/check-out and customer bills.	OOP, dictionaries, functions, files
11	Vehicle Rental System	Rent vehicles, calculate rental charges and manage availability.	OOP, lists, dictionaries, date/time
12	Employee Payroll System	Calculate employee salary, allowances, deductions and net salary.	Functions, OOP, arithmetic, files

CORE PYTHON PROJECTS

13	College Attendance System	Record attendance and calculate attendance percentage.	Lists, dictionaries, functions, files
14	Online Examination System	Display questions, conduct exam, calculate marks and generate result.	Lists, dictionaries, functions, files
15	Movie Ticket Booking System	Display movies, manage seats, book/cancel tickets and calculate price.	Lists, dictionaries, OOP, files
16	Hospital Management System	Manage patients, doctors, appointments and basic billing.	OOP, dictionaries, functions, files
17	To-Do List Application	Add, update, delete and mark tasks as completed.	Lists, dictionaries, functions, file handling
18	Bus/Train Reservation System	Search routes, book/cancel seats and calculate fares.	Lists, dictionaries, functions, OOP
19	Restaurant Ordering System	Display menu, take orders, calculate bill and generate receipt.	Lists, dictionaries, loops, functions
20	Electricity Bill Calculator	Calculate electricity bills based on units and slab rates.	Functions, conditions, loops, calculations
